Can **AI Grand-Challenges** inform Regulatory Science in Anatomic Pathology

Francesco Ciompi, PhD
Roberto Salgado, MD

In this project we are exploring how the experience and approaches taken in AI grand challenges can provide data and knowledge that may help inform regulation. The project main aim is to collect information, opinions and provide an outline of relevant points.

We look forward to seeing you there. As always, feel free to reach out with any questions or inquiries.

Have a great weekend.
