Dear Plcc Alliance

There are a couple of upcoming changes of note as we wrap up April and head into May.

We will not be hosting a live, virtual updates meeting for the month of April. In place of the standard Steering Committee Series meeting, we will be sharing a pre-recorded video featuring the voices of our community members on relevant topics.

One of the topics of interest is the upcoming in-person meeting, Plcc23: Unlocking the Potential of Digital Pathology and AI through Regulatory Science on June 27-28. An official announcement, event program, and location details will be announced in the coming weeks.

April updates will be posted as usual on the website ([link](#)).

Curious about how to regulate evolving AI?

Following the FDA release of the draft guidance [Marketing Submission Recommendations for a Predetermined Change Control Plan for Artificial Intelligence/Machine Learning \(AI/ML\)-Enabled Device Software Functions](#), members of the community expressed interest to gain additional context and understanding of the topic.
